Design team's work

Responsible for storytelling across platforms, with a special emphasis on mobile

- Experimental digital (custom, immersive)
- Interactive components, use of multimedia
- Original illustration
- Social media carousels
- Print publications

Vision and direction

My leadership role:

- Amplify exclusive reporting with premiere digital experiences
- Give Post a competitive advantage by attracting new readers, reinforcing value for subscribers
- Repeatable formats to scale the work
- Reinforce consistent news brand identity

Start by experimenting

Shared custom templates allowed graphics and design to tell stories beyond standard articles

Non-traditional narrative elements used again and again became formats

Dev support continued to improve infrastructure, making it easier to do custom work while also building new formats

Audio as an example

High demand from reporters, low click rates from readers

Interactions increase when audio is central to the story

- AI fake voices
- Earworm songs
- EV car sounds
